

Periodontology

Your trusted partner for leading dental specialist treatments.

Welcome

Specialist Periodontal Services

Dakatra is a unique state-of-the-art specialist treatment and education centre near Canada Water in London.

Our expert consultants, professors and experienced clinicians are at the forefront of healthcare. Whether we're working with you as colleagues, or managing patients directly, we deliver superior levels of care at scale.

And as a trusted provider of accredited courses through our academy, we share the most up-to-date knowledge for healthcare providers.

Our periodontist and hygienist can manage the following conditions and provide the following treatments:

- Gingivitis
- Oral Hygiene Instruction
- Stain removal
- Professional Mechanical Plaque Removal
- Chronic Periodontitis
- Furcation involved teeth
- Gingival recession
- Occlusal trauma
- Perio-endo lesions
- Acute Necrotising diseases

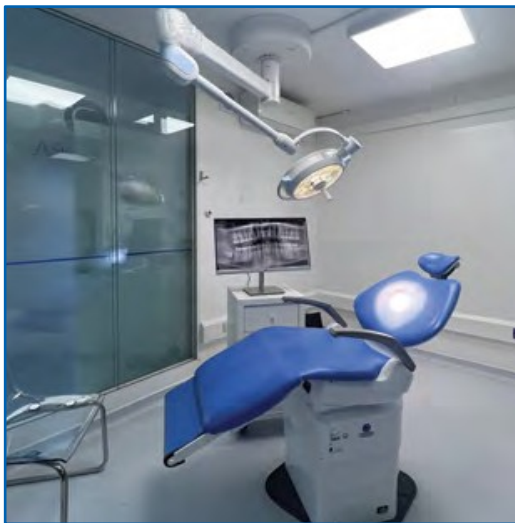

They can also take care of the following as required:

- Radiographs
- Blood tests
- Intravenous sedation
- CBCTs
- Inhalation sedation

Dakatra's promise to you

When a patient is referred, Dakatra responds to the specifics of the referral letter and not beyond. We direct the patient back to the referrer once the requested treatment has been completed.

Although we do not entice patients introduced to us by referrers, naturally we do of course welcome any patient wishing to access our care independently.

In addition to periodontology services, Dakatra also provides the following services for adults:

- Hygiene and Therapy services
- Paediatric Dentistry services
- Oral Surgery services
- Treatment of Varicose Veins and Spider Veins

Referral Process

Periodontology at Dakatra

Led by Samy, an experienced GDC Specialist in Periodontology

Periodontology encompasses the management of the supporting structures of the dentition including the gingivae, soft tissues, oral mucosa, periodontal ligament and surrounding bone.

The periodontal service works closely alongside the hygiene and therapy service to provide multidisciplinary care

Hygiene services at Dakatra

We offer an advanced service of hygiene therapy including oral hygiene management and professional mechanical plaque removal.

We have experienced hygienists who provide care to patients with the focus required for bespoke treatment, together with the required encouragement to support every patient with their needs.

Reviews

"I strongly recommend Dakatra as a specialist dental centre to refer to. As an orthodontist, I sometimes see patients with TMJ dysfunction. I refer to Dakatra where they successfully manage the patients conservatively and keep me updated with progress. This specialist referral clinic provides honest and efficient professional support".

Sabena Bhuiyan

Align & Smile Dental
Practice

"I have been very happy with Tarik and Samy's service. They are always accessible for advice and support. I often send them X-rays and photos to look at for me, and they are very responsive and helpful. As a general dentist, it's great to have a specialist referral centre to rely upon for added expertise".

Dr Ahsan Mirza

Ivy House Dental, Camden Claradent Dental Care, Hounslow Petts Hill Dental,
Ruislip

"I was referred to Dakatra by my dentist for the removal of an impacted wisdom tooth that was hurting me and getting infected. I was really nervous, but once I met Dr Tarik, the surgeon, and Professor Kariem, the anaesthetist, I quickly began to realise that I was in the safe hands of a couple of real experts, who do this type of thing day-in, day-out. Professor Kariem sedated me, and I don't even remember Dr Tarik removing the tooth. It was a great experience, and I couldn't have wished for it to have gone any better"
